Health Information Management (HIM) is a combination of business, science and information technology. Health Information Management professionals are managers: experts in processing, analyzing and reporting information vital to the health care industry. These professionals work in hospitals, accounting firms, insurance companies, information systems vendors, government agencies, pharmaceutical research companies and others.

The HIM program begins in August when students enter their first semester of professional coursework on the KU Medical Center campus in Kansas City, KS. After graduation, HIM students are eligible to sit for the American Health Information Management Association National Registry Examination. Graduates that pass this exam become credentialed and nationally recognized as a Registered Health Information Administrator (RHIA).
